Re: Compliance Information, Bureau of Safe Drinking Water  
Noncommunity Water Systems, Transient and Nontransient

---

In compliance with Assembly Bill 2160, the Bureau of Safe Drinking Water has developed a set of guidelines for non-community water systems in order to comply with Nersey State Law.

A School categorized as non-community water system will make available to staff members and parents/guardians the results of the annual drinking water quality report.

The results of the test are on file in the office of Eagleswood Township Board of Education, 511 Route 9, West Creek, NJ. Please note that all results were within normal limits. Testing performed by Middlesex Water.

By the order of EAGLESWOOD TOWNSHIP BOARD OF EDUCATION
